

Builder Hanger—West side of A340

The month of May was a minor turning point for us. We were finally able to acquire and erect a giant sign announcing our Builder Center, and we erected it just in time for the Chino Air Show. The sign has Chapter 92's web address and a new phone number for anyone interested in building here. Most important, it's visible from Flo's Cafe and can even be seen from Merrill Avenue.

It took less than 10 days to get our first call from a builder. He's coming down the second weekend of June to tour the premises, and hopefully move in shortly thereafter. I'd say the sign is already working.

Special thanks go out to several people who really helped make this happen. Robert Baker relentlessly pursued vendors and graphic artists from California to Oshkosh, and was able to get everything needed to make the sign ... and all of it donated! I told you he was relentless!

Roland Koluvek and Tom Steury can attest to the sheer size of the sign. Even though the sign was made from rip-stop nylon, it weighed a ton, and every breeze was ready to sail them away! (6 by 30 feet is a LOT of surface area!) Tom and Roland stuck with the project, tight schedule, and difficult installation to make sure the sign was erected before the Chino Air Show. Kudos to them both.

We'd all like to recognize Corey Brixen at Brixen & Sons for manufacturing our massive sign. Please visit them at <http://brixen.com> if you ever need screen printing or large format digital work - they have done a phenomenal job! Also, we'd like to thank Yanks Air Museum for loaning us their lift. This saved us hundreds on rental fees, and we wouldn't have been able to install the sign in time without it.

Again, thank you all for helping out and making this happen.
